SUBJECT THROW PINS FOR 6B, 27B AND 37B PADLOCKS

Our Engineering Department has designed a new throw pin concept for our 6B, 27B and 37B padlocks, only. We feel this may add greatly to the security of these padlocks.

The throw pins will not be attached to the throw member as are the present ones. They will be placed in the core throw pin holes and fit loosely into the throw plug. The idea being, if someone were to use a plug puller, the pins will fall out with the plug, thus making the throw plug inoperative.

The price will be the same as a standard unit. This is available in 6 pin only.

When ordering this feature on a 6B, 27B or 37B, please specify an "L" on the end of the nomenclature. (i.e., 6B62L)

If there are further questions, please contact this office.

Thank you.
